ADAM GILL

adam.douglas.gill@gmail.com • (724) 413-7259 • adamgill.io • Pittsburgh, PA

EDUCATION

Waynesburg University, BS in Computer Science and Mathematics   **2022 — 2025 (Projected)**

Relevant Coursework: Data Structures, Analysis of Algorithms, Java I, C/C++, Database Management, Programming for the Internet, AI w/Python, Calculus II & III, Discrete Math, Statistics I, Linear Algebra

- 3.98 GPA
- Computer Science Club Vice President
- Member of the Honors Program and Dean's List

WORK EXPERIENCE

Software Engineer Intern - FENIX.AI   **Mar 2024 — May 2024**

- Collaborated in an agile environment with data engineers/analyists & SWE's to deliver our product
- Developed a Next.js app (TypeScript) deployed with vercel for FENIX.AI clients to view dashboards
- Implemented user authentication with Auth0 and configured SSO (SAML 2.0) to Domo
- Created protected routes so that only authorized users can view FENIX.AI's dashboards
- Embedded 3 interactive domo dashboards visualizing key data suchy as attorney efficieny

Software Engineer Intern - BCAMP   **Jan 2024 — Feb 2024**

- Operated in an agile environment developing a telegram crypto trading bot using python
- Managed a MySQL database with Azure to track users and their active crypto alerts
- Integrated Dune API to fetch real-time on-chain data for users' active notifications
- Created an Ubuntu server accessible via ssh to run the bot indefinitely

PROJECTS

Full Stack AI SaaS Platform - Link   **Jan 2024**

- Created an entire AI SaaS platform hosting AI services with a free and premium tier
- Implemented user authentication with Clerk and MySQL database hosted on PlanetScale
- Developed pages for users to create AI content (code, chat, imgae, & more) provided by OpenAI API
- Used Stripe for payment processing (monthly subscription) and Crisp for full user support

Technologies: Next.js, React.js, Tailwind CSS, Prisma, MySQL, Stripe, Clerk, Crisp

Fullstack X (Twitter) Clone - Link   **Jan 2024**

- Implemented like, comment, and follow features for all users authenticated via NextAuth
- Stored user data (encrypted passwords) and post data with Prisma and MongoDB
- Created the entire web app with a fully responsive design

Technologies: Next.js, React.js, NextAuth, Tailwind CSS, Prisma, MongoDB, Vercel

Fullstack Netflix Clone - Link   **Dec 2023**

- Implemented user authentication with NextAuth, Google, and Github
- Populated users, accounts, favorite movies, and movies MongoDB database using Prisma

Technologies: React.js, Next.js, NextAuth, Tailwind CSS, Prisma, MongoDB, Vercel

TECHNICAL SKILLS

- **Langauges:** JavaScript, TypeScript, Python, Java, C/C++, HTML/CSS, Tailwind CSS, C#/.NET
- **Technologies:** React.js, Next.js, Redux, MongoDB, MySQL, Azure, Git, Github, Docker, Vercel, Linux, Windows, MacOS, VS Code, Visual Studio

ACHIEVEMENTS

Awarded A.B Miller and Donald & Christine Bush Scholarships   **2022**

6th in class in 2023 Scooter Cannonball   **2023**

8th at the CCSC Eastern Programming Competition   **2023**
